uhlsport of GERMANY

German Technology.
As a German company we feel especially committed to technology.

We set the highest technological standards, beginning with the initial design concept of each and every product. We believe our focus should always be on ultimate functionality. That‘s why our development team sets clear objectives for our range of items. Our football kits and equipment have to satisfy the highest demands. We leave nothing to chance. All the products which make it into our range each year have come through a strict development process. If at the end of any phase in the development of a product there are no improvements it can not remain in the development cycle.

This highly technological development process is both precise and emotional. Our team of designers and developers put their hearts and souls into every product they work on. That‘s why our products always perform. The emotional engagement of our team drives them to to come up with the unexpected again and again. New improvements, innovative patents and strong designs.

The final stage of this process happens far away from our premises, our products receive their baptism of fire. On various playing pitches in all weather conditions they are tested, evaluated and if all goes well are given the go-ahead for sales release. Our pool of quality assurance testers cover all levels of play and competition from Bundesliga professionals down to the grass roots at amateur levels.

Why is this? Well we want to do everything in our power to make sure that only the best possible products find their way onto the market.

TECHNOLOGY
DRIVEN

Technological..
This is how uhlsport see a football brand from the 21st century for the 21st century.

separate and independent

uhlsport is different and is a performance-oriented brand for people with the same vision.

social responsibility

The uhlsport brand needs to be accessible to all.

uhlsport of GERMANY

Unconventionally German.
uhlsport is a brand identified with modern Germany. And being German implies a set of obligations:
Being German implies a performance standard for our products - which always strive to create a perfect symbiosis of design and function, a responsibility to meet social and environmental standards and respect and positive interpretation of our identity.
We are German. Maybe atypically German.
But we are happy to be German.

being different is important

In order to be taken seriously, a brand needs both a clear unique sales propositions and be truly memorable: The character of a brand is just as important as its value. **uhlsport‘s** brand strategy involves presenting the unique sales propositions with an explanation of the unique brand characteristics which signify both the brand‘s innovative products and marketing concept.

Mission.

We are proud of our independent tradition and our identity. We always try to question accepted practices. Clinging to the past will not move us forward. With each passing season we want to get ever closer to producing an ideal product and we will work with free and creative thinkers around the world on our solutions. We always want to be accessible and close to the people we interact with.

ADHESIVE FOAM - TECHNOLOGY

SUPERGRIP

The adhesive foam for ultra strong grip.

High Grip Performance.
Supergrip. A new type of adhesive foam technology with high-grip elements.
Benefit: ultra-strong grip and optimal durability in the adhesive foam.

SOFT

Further variations for the grass pitch?

Our soft foams which all have the same thing: The balance between grip and abrasion resistance. The voluminous and softer, the better the grip and greater the abrasion. The more compact, the longer it will last. Only you know your personal balance. Try them. Decide between: SUPERSOFT, SUPERSOFT+, SOFT oder STARTER SOFT.

CUT - TECHNOLOGY

NORMAL DESIGN

Exterior seam design maximizes the inner hand surface. Sure handedness increases with the contact surface on the ball.

NEGATIVE PATTERN

Interior seam helps create tighter fit and optimal ball control.

ROLLFINGER

Ergonomic exterior seam design provides for seamless complete grip.
Benefit: 100% grip.

FINGERSURROUND

Combination of inner seam and ergonomic external design provides a tight fit and maximum grip on the ball.

FRAME - TECHNOLOGY

BIONIKFRAME PLUS

BIONIKFRAME+

Bionikframe+ with Thumbframe.

The thumbs plays a truly important role in your hand. It is the strongest finger. Gripping and throwing are its best disciplines. Its carpometacarpal joint gives a great amount of freedom to this gripping finger. Of course it also needs to be predected. However stabilization while maintaining freedom of movement is not very simple. Nonetheless. We have done it and can reliably predect your thumb. **BIONIKFRAME+** with **THUMBFRAME.**

BIONIKFRAME

BIONIKFRAME

The light, flexible support.

The **BIONIKFRAME.**
Inspired by nature – the greatest system ever – the **BIONIKFRAME** is based on a design, which precisely imitates and supports the function of our natural ligaments. The result: Stable. Flexible. Light.
For all those who claim predection is nothing for them.

SUPPORTFRAME

SUPPORTFRAME

The classic

SUPPORTFRAME provides optimal stabilization even in the basic and children's models. The hinge-like finger structure offers the best predection while ergonomically supporting the hand.

SUPPORTFRAME PLUS

SUPPORTFRAME+

Supportframe+ technology.

The patented finger and thumb stabilization system supports the catch movement. The hand is relieved by the anatomical preforming and lightweight construction. Due to the integrated backhand plate an optimal shock absorption and force distribution is possible.

TUBE IT

THE TUBE IT PRODUCTS

The uhlsport TUBE IT was designed to improve your game and provides you more stability and grip with every move. The interaction of the three components with the TUBE IT socks, the TUBE IT sleeves and the TUBE IT tapes mean you are ready to take on any opponent.

The **TUBE IT socks** have several features such as an anti-slip zone on the foot soles providing maximum stability in the shoe. Compression in the foot area provides improved fit while also aiding blood circulation. The anatomically formed sides of the TUBE IT socks provide additional comfort. Entry into the socks is easier thanks flexible ribs at the end which also help hold the shin guard in place.

De **TUBE IT sleeve** replaces normal compression socks by simply being pulled over the TUBE IT socks and the shin guards. The TUBE IT sleeve with net inserts provides better ventilation. Ribbing at the end improves flexibility and makes entry easier. The compression socks no longer need to be cut off at the end.

The self-adhering **TUBE IT tape** connects and secures the TUBE IT sock and TUBE IT sleeve in the ankle area, while providing support.

NEW IN 2017

COMFORTABLE WEAR

ERGONOMIC FIT

TUBE IT SLEEVE

EASY ENTRY

ANTI-SLIP ZONE

ENHANCED ERGONOMICS

TUBE IT TAPE

MAXIMUM SUPPORT

uhlsport *TUBE IT* - WEAR YOUR OWN SOCKS!

STEP 1

Pull on TUBE IT socks and pull the sock shaft over the shinguards.

STEP 2

Pull the TUBE IT sleeve over the TUBE IT socks and shinguards. Smooth the TUBE IT sleeve over the ankle.

STEP 3

TUBE IT tape is wound several times below the shinguards and over the TUBE IT sleeve.

STEP 4

Cut TUBE IT tape and press tight on all sides.

STEP 5

Ready for kick-off!
